

Expanding Ideas

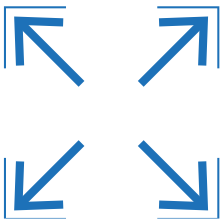

This tool is good for encouraging conversations where everyone can express thoughts, opinions and ideas.

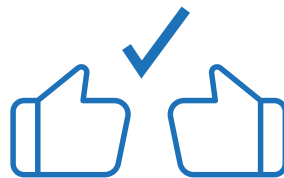

Use the layers to stretch out ideas, conversations or thoughts.

Suggestions for use

Explore the implications of decisions by leading participants through questions and outcomes.

Ask participants to determine what is important (on the outside of the tool) and what is a less important detail (on the inside).

Leave the ideas expander in a shared space for people to answer the questions semi-confidentially under the paper flaps.
