

Wheel of priorities

This tool is good for deciding what to focus on.

Write outcomes, categories, KPI's or any other perspective that is relevant to your project.

WHEEL OF PRIORITIES

Use this wheel as a dartboard, or as a prize wheel.

Think about the outcome and focus on it.

Suggestions for use

Use the wheel to explore and discuss different aspects of a project, including dimensions that may be neglected but which may provide useful insights.

Select 2 priorities from the wheel to create a 2 axis graph. Map the expected outcomes of an engagement activity or project activities on post it notes in the graph according to the chosen axis. Repeat this activity using different priority axis to better understand your priorities and outcomes.

See the Prioritise Together tool instructions for an example of how to create your priorities graph with a link to the tool.

Host a creative discussion about a project/issue from a wide range of perspectives. Ask participants to throw a dart onto a giant wheel to select what they will be discussing.
